

ITS SIGNAL SYNCHRONIZATION PHASE III & IV P20-006 (CML-062 & 063)

Project Description:

The work consists of installing fiber optic and signal interconnect cable and associated hardware to connect signalized intersections and update traffic signalization timing to the City's existing Traffic Operation Center. The project will also include the development of the City's master ITS system.

Funding Source:

Measure L Funds – Traffic Management Project - \$107,200.00

Federal Transportation Funding, SB1 Road Maintenance & Rehab – 642,800.00

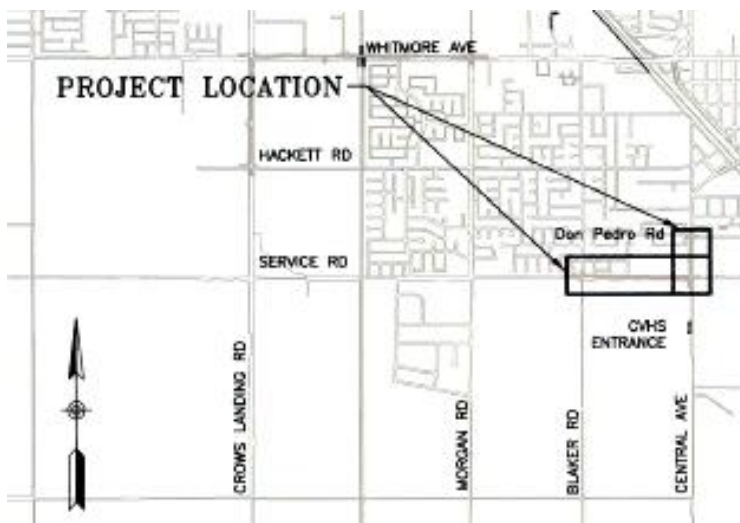

Project Budget:

Construction Cost - \$750,000.00

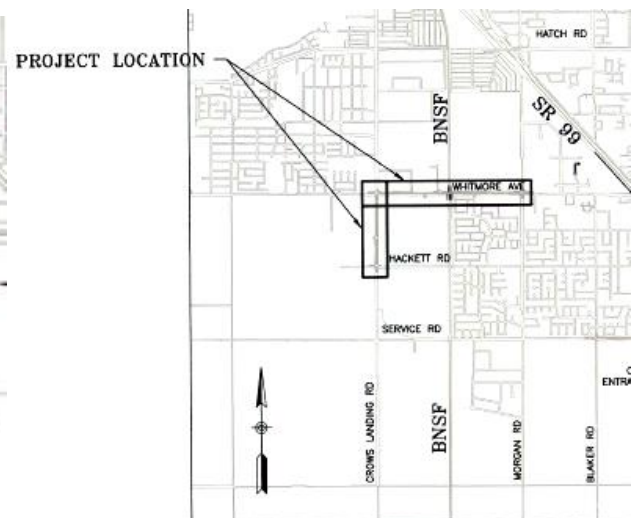

Project Status:

Bid received May 27, 2021 and it was way over the budget. Rebid date TBD and possible redesigning to lower the project cost.

Location:

PHASE III

PHASE IV
